TwistLock® Blade Setting System

Changeover Time Reduction Accessories For Fixed Saw Blades

Innovation to Facilitate Fast and Accurate Changeovers

TwistLock[®]

TwistLock saw collars are manually locked into the desired position with the supplied “T” handle wrench providing positive locking power. Great for narrow rip application requirements.

Key Features and Benefits

- Fast changeovers and reduced down time increase your productivity and enhance production flexibility.
- Change one rip pocket without disturbing the remainder of your arbor set-up.
- More reliable than expanding arbor or key mechanisms which can fail, causing machine down time.
- Collars are individually locked for greater accuracy.
- Eliminates saw sleeve and spacer handling and maintenance.
- Easy to add or subtract rip pockets as needed.
